

Gain **20/20** vision

of your technology environment

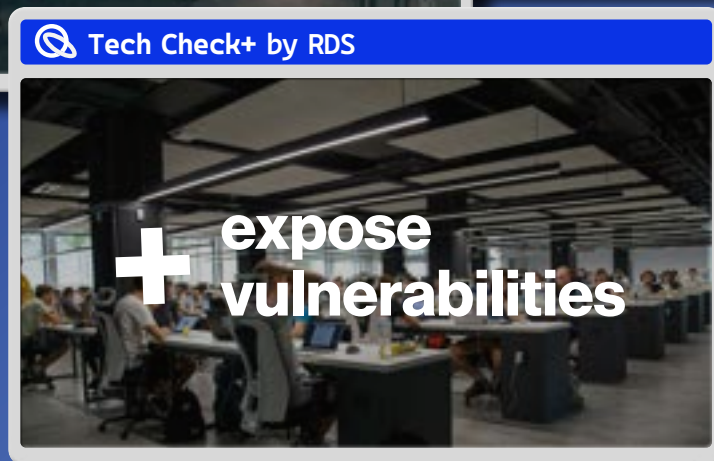

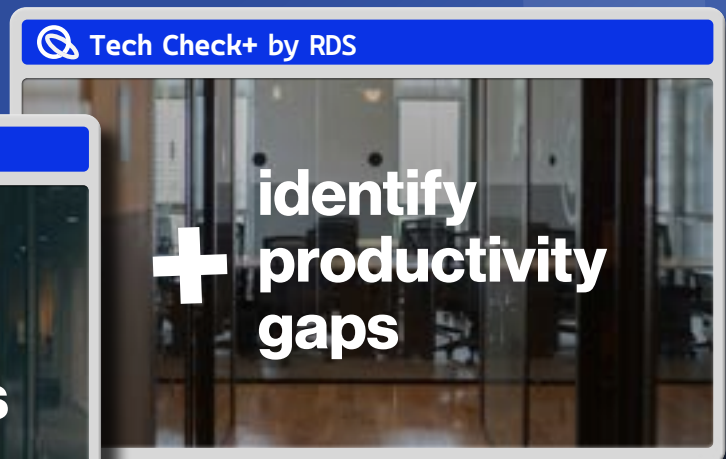

The workspace audit that
brings everything into focus

Struggling to optimise your **IT** infrastructure?

We'll assess your **workspace**
technology...

that's many
pluses for your
business.

Your **Workspace Technology.** Fully Audited. **Fully Understood.**

Tech Check+ delivers a holistic view of your workspace technology environment, covering areas including:

Focus Area	What We Assess	Pluses You Gain	
IT Infrastructure	Devices, networks, software, security, cloud readiness, backups	Visibility over all assets, risks and opportunities	+
Cyber Security & Compliance	Data risks, patching gaps, firewalls, endpoint protection, remote working vulnerabilities	Stronger data protection, greater control, enhanced data compliance	+
Workspace Performance	Bottlenecks, outdated tools, duplication, underutilised platforms	Increased productivity, optimised workflows, AI-ready processes	+
Communications Systems	VoIP, mobile, video tools, call routing, bandwidth, hybrid working setup	Better connectivity, clearer calls, improved employee experience	+
Sustainability & Emissions	Power usage, device lifecycle, emissions, cloud vs on-prem, circular economy readiness	ESG progress, cost savings and a greener technology footprint	+
Print Environment	Fleet usage, device layout, workflow efficiency, print waste, document security	Reduced print costs, improved control, enhanced compliance	+
Strategic Oversight	Full environment mapping, visual layouts, usage trends, cost leakage	A clear action plan backed by evidence and expert recommendations	+

The Tech Check⁺ journey

A proven pathway to **smarter technology decisions**

#1

Discovery Consultation

We get to know your business, objectives and existing technology environment.

#2

Data Collection

Deploying assessment tools, we gather forensic-level detail about your infrastructure.

#3

Analysis and Mapping

We map assets, workflows, print environments, communications systems and security resilience.

#4

Sustainability Review

We assess your energy use, emissions impact and opportunities for greener operations.

#5

Risk and Cost Analysis

We identify vulnerabilities, cost drains and optimisation opportunities.

#6

Recommendations and Roadmap

You receive a clear, prioritised action plan tailored to your business needs and future goals.

Fast, focused and business-ready.

Tailored to suit your environment and timelines.

Are you ready for what's next?

Alongside actionable insights into your current setup, Tech Check+ reveals how well your business is positioned to adapt, protect and grow.

Security Resilience

We reveal hidden vulnerabilities across IT, print and comms - giving you a clear path to stronger defences and better compliance.

32%

of UK businesses experienced a cyber breach in 2023.

(DCMS)

Sustainability & ESG

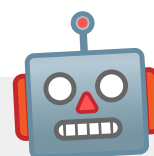

We assess energy use, emissions and waste - so you can align with ESG goals and reduce your footprint.

93%

is how much emissions can be reduced by migrating to the cloud.

(Microsoft Azure)

AI-Readiness

We assess how well your data governance and infrastructure are positioned to support secure AI adoption.

75%

of UK executives say legacy IT impairs agility.

(NTT Data)

Still relying on on-premises servers?

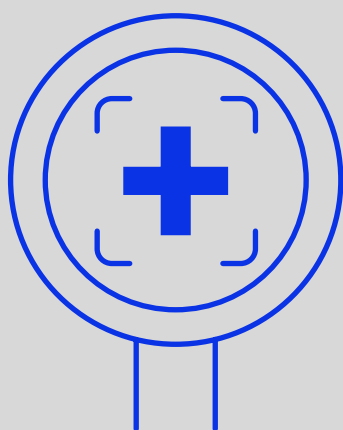

Then your assessment will highlight opportunities to migrate to the cloud, helping you:

- + Cut infrastructure costs
- + Boost resilience
- + Reduce carbon emissions

RDS Tech Check + You = Success

Gain actionable insights to **optimise** your operations.

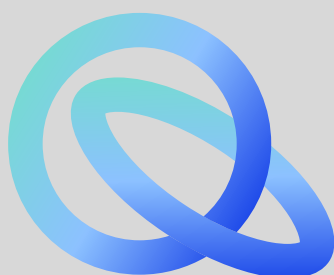

RDS Tech Check + You = Success

Your Plus Points:

- Reduce operational costs
- Strengthen cyber security and compliance
- Prepare your business for AI-powered growth
- Improve IT infrastructure resilience
- Uncover hidden productivity gaps
- Support ESG and net-zero targets
- Build a sustainable, futureproof tech strategy

Did you know?

After your Tech Check⁺

RDS can help you implement, optimise and manage your IT, communications and print systems - turning today's insights into tomorrow's competitive advantage.
